

The Girl Who Made Friends with a Bee

By Charlotte Dietrich, rising 5th grader

It's Monday, June 8th and I'm on my way to summer camp. It's my first day! When I arrive, I drop off my backpack in the room and meet my counselor. After that, we play some games like tag, hide and go seek, and water balloons. As soon as I know it, it's time for lunch. I sit with my group of friends and eat my delicious peanut butter and jelly sandwich. After that, it's pool time! We swim in the pool for an hour and then it was chill time. I pull out my school work for the summer. I am so excited to finish it because if my whole class finishes it, we get a surprise on the first day of school and everybody is participating. I look up from my work when I notice a bee stuck in a spider web! I get up when the counselor isn't looking and take the bee out of the web. (I love bugs!) I go back to my work to try and figure out the question I am on. That night, I sit at my desk trying to figure out the same question. My mom and dad are busy and I have no one to help me. Then, I hear a buzzing sound! It's the bee I saved! The bee comes over, takes my pencil, and does the problem for me! In the end, I hope you always remember the Golden Rule. Treat others the way you want to be treated!
